

Festive Yule Spell for Prosperity and Love in the next Decade

What you will need: a red, green, gold, or white candle and a lighter. Optional: green, red, or gold glitter, and cinnamon, cedarwood, pine, thieves, myrrh, or frankincense oil.

How to conduct your Yule Candle Spell:

1. Say a prayer invoking the universal life force energy—call in any spirit guides, guardian angels, and deities you resonate with, the energy of winter, the Goddess, and the God.
2. Take your candle, and if you have oil and glitter, anoint your candle with your oil and then cover it in glitter. Optional: you can also carve anything that resonates with you and the Yule energy into your candle using a knife before you anoint it with oil, I usually carve “blessings,” but soak up the energy and let it come to you.
3. Light your candle.

Say the following spell aloud:

*As I sit in reflection on Winter's longest night,
I welcome with my candles the return of the light.
Into the new year, rebirthed and renewed,
Prosperity and love will lead me through.*

Keep your candle burning throughout the day and night, and light any additional candles you have in your home to spread the Yule light throughout every room. Yule is a wonderful time to spend with loved ones in celebration, to spend time with people who feel safe, and to spend time in reflection as you set your goals and wishes moving into a new year and decade.
